

KONDEPUDI SION RANI

Kakinada, Andhra Pradesh, India | +91 9000770510 | kondepudisionrani@gmail.com | linkedin.com/in/sionrani | github.com/SionRani

PROFESSIONAL SUMMARY

Civil Engineering student with hands-on construction experience through an L&T Construction internship at TIMS Super Speciality Hospital, LB Nagar, and practical exposure to planning, quality, execution, finishing, EHS and MEP coordination. Skilled in Primavera P6, AutoCAD, Excel and Power BI, with project experience in construction scheduling and quality analytics. Strong interest in construction planning, project coordination and execution.

EDUCATION

University College of Engineering Kakinada (Autonomous), JNTUK 2023 – 2027

B.Tech – Civil Engineering | Expected May 2027 | CGPA: 7.95/10

SRM Institute of Science and Technology – Directorate of Online Education 2023 – 2026

BCA – Data Science | Completed 2026 | CGPA: 9.7/10

TECHNICAL & CORE SKILLS

- Civil & Construction: Site Execution, Quality, EHS, Finishing, MEP Coordination, Material Testing, AutoCAD, ETABS
- Construction Planning, Progress Monitoring, BOQ & Quantity Takeoff, Primavera P6
- Data & Analytics: Python, SQL, Power BI, Tableau, Excel, Data Visualization
- Tools & Platforms: MS Office (Word, Excel, PowerPoint), Jupyter Notebook, Git, VS Code
- Core: Project Coordination, Problem Solving, Communication Skills, Teamwork, Leadership, Collaboration, Time Management, Analytical Thinking

INTERNSHIP EXPERIENCE

Civil Engineering Intern, L&T Construction — TIMS Hospital, LB Nagar May 2026 – Jul 2026

- Gained practical exposure to construction execution, quality control, EHS, finishing and construction planning at a major building project.
- Worked across Planning, Execution, Quality, Finishing, Rebar, MEP, P&M, IR & Stores functions.
- Observed construction activities including reinforcement, concrete works, masonry, finishing and MEP coordination.
- Gained exposure to site coordination, progress monitoring, quality inspections, material testing and construction procedures.
- Developed understanding of construction sequencing, site safety practices and coordination between project functions.
- Compiled sample-level site data into records used for a self-built quality-tracking dashboard.
- Built the Construction Quality Analytics Dashboard (Power BI) analyzing 27 aggregate/mechanical and 11 volumetric test records, tracking KPIs (specific gravity, water absorption, bulk density, crushing/impact values) with Year, Material, and Location filters.

PROJECTS

G+10 Building Construction Planning & Scheduling | Primavera P6 [LINK](#) | 2026

- Developed a detailed Primavera P6 construction schedule for a G+10 building project.
- Created WBS, activities, durations, calendars, milestones and activity relationships for major construction stages.
- Planned construction sequencing covering substructure, superstructure, masonry, finishing, MEP and external works.
- Analyzed project duration, critical activities and float for systematic schedule monitoring.

Construction Quality Analytics Dashboard | Power BI [LINK](#) | 2026

- Developed a Power BI dashboard for analyzing construction material testing and quality-control data.
- Analyzed test results across materials, locations and test categories using interactive dashboards.
- Created KPI cards, slicers and visualizations to monitor quality performance and identify deviations.
- Applied construction quality concepts to support data-driven quality monitoring and reporting.

House Price Prediction | Regression Analysis, Python [LINK](#) | 2024

- Built a regression model in Python on 1,500+ rows across 10+ features, achieving a 92% R^2 score; cleaned, transformed, and published results to GitHub.

Rainfall Data Analysis | Power BI / Python [LINK](#) | 2025 – 2026

- Analyzed historical rainfall data using Python and visualization techniques to identify seasonal patterns and trends.
- Developed visual reports to communicate rainfall trends and support civil engineering and environmental analysis.

ACHIEVEMENTS & ACTIVITIES

- 1st Prize – Essay Writing Contest, FIPI Student Chapter; 2nd Prize – Art Smart Contest, Season 1 (2025)
- Coordinated "Master Builder," a structural design competition, at Soudha National Technical Symposium, JNTUK (2025, 2026)
